Weather Report Data OPALESCE Kick-off Meeting

26th and 27th of February 2015, Almeirim

This documents shall give an overview of the data collected by using the Weather Reports at the Kick-off Meeting of the OPALESCE Project, hosted by RUTIS in Almeirim. All participants have filled in the questionnaire, handed out at the End of the meeting to evaluate the workshops content, the workshops design, the coordination and the results of the workshops. There is no incomplete set of quantitative data, but some of the participants have skipped the open-ended questions which were concerned with recommendations for improvements of the OPALESCE project and its consortium.

Qualitative Data

What would you like to suggest for the future cooperation / communication in the OPALESCE project? What other improvements would you recommend for the OPALESCE project?	
1	Well supported + well prepared project proposal
2	Since there was a good communication between the partners in this kick-off meeting where many of us met for the first time, I think it looks that the communication + cooperation will be good. It's early staged, hence, no particular comments yet. I hope that the atmosphere and the collaboration will be as good as it was by this 1 st meeting.

5	Continue the great communication between partners.
6	We should keep the open and informal communication for the whole workshops and the project itself. It is necessary, I think, to prepare the monthly tasks well and to adhere the deadlines.
7	I think everything was OK and the help from the man of the National Agency was very important.
8	Now that we have all met communication will be better since we also have tools to do so. At this moment I have no recommendations. I guess that as the project goes by it might change.

What else would you like to pass on?	
1	Highly demanding project + different type, than the ones experienced. Quite liked the idea of "constructive flexibility" and look forward to experience its progress and development. Scientific-based and evidence based research will enrich the professional development of all people involved and will introduce us into a new "type" of ideology + pedagogy.
